PRŮHONICE, February 10th 1924.

Dear Sir,

We beg to inform you, that a new Dendrological Society has been founded at Prague, which continues the work, which had been begun before the war by the Dendrological Society at Vienna, dissolved in 1919. The Society garden at Průhonice has now been taken over by the new Society and we want now to collect at Průhonice all the valuable trees, shrubs and herbaceous plants we can get, in order to revive a taste for gardening in Czechoslovakia.

We should be much obliged, if you would procure us seeds and material for the propagation of plants hitherto unknown or rare in this country, in exchange for special plants or seeds from our gardens at Průhonice.

Our new Catalogue of plants will be published in a few days and will be forwarded at once. It will afford us great pleasure to supply you with anything you may be wanting.

Hoping for a favourable reply, we remain

very faithfully yours
